Table D.4-17 contains the measured channel characteristics for NOAA-18 AMSU-A (channels 1-15). The central frequencies are interpolated from the temperature dependent data to 15 C. The f1, f2, f3, and f4 for channels 11-14 are computed from tabulated values. All values are for 15 C. Detailed information on the terminology used in this table can be found in Section 3.3.2.1.

Tables D.5-8 and D.5-9 contain the corresponding spectral response values for MetOp-A AVHRR/3 Channels 1, 2, 3A and Channels 3B, 4 and 5, respectively. Note: Negative response values were caused by system response noise and are to be ignored but are included in the table for completeness.

Table D.5-17 contains the measured channel characteristics for METOP-A AMSU-A (channels 1-15). The central frequencies are interpolated from the temperature dependent data to 15 C. The f1, f2, f3, and f4 for channels 11-14 are computed from tabulated values. All values are for 15 C. Detailed information on the terminology used in this table can be found in Section 3.3.2.1.

Abnormalities:

Up to date information regarding abnormalities on the POES spacecraft and instruments can be found at: <http://www.oso.noaa.gov/poesstatus/>. This website allows a user to search and sort on any POES spacecraft, subsystem or instrument status. Once a user narrows down their window of interest, further details can be obtained by going to the NOAA/NESDIS/Office of Satellite Operations' (OSO) archive of weekly status reports at: <http://noaasis.noaa.gov/NOAASIS/ml/podocs.html>.

2	0.217591	0.832045	225.698
3A	0.436100	1.610063	10.650

Note: These quantities are based on the solar irradiance data of *Neckel and Labs* (1984), which is a widely used source of such data.

Table D.6-7 contains the temperature-to-radiance coefficients for NOAA-19 AVHRR/3 Channels 3B, 4 and 5.

<b>Table D.6-7. NOAA-19 AVHRR/3 Thermal Channel Temperature-to-Radiance Coefficients</b>			
	$\nu_c$	A	B

Channel 4	928.9	0.53959	0.998534
Channel 5	831.9	0.36064	0.998913

Tables D.6-8 and D.6-9 contain the corresponding spectral response values for NOAA-19 AVHRR/3 Channels 1, 2, 3A and Channels 3B, 4 and 5, respectively. Note: Negative response values were caused by system response noise and are to be ignored but are included in the table for completeness.
