# *Publications*

- *Publications with a NESDIS co-author need to go through a review on the NESDIS side prior to being finalized*
  - *Scientific review as well as a review to verify appropriate disclaimers are included*

# Acknowledgements

- *NOAA works hard to acknowledge our CIs when including figures/citations from CI employees*
  - *Let me know if we need to work harder*
- *Please acknowledge NOAA when including figures/citations from NOAA employees*

# Disclaimers

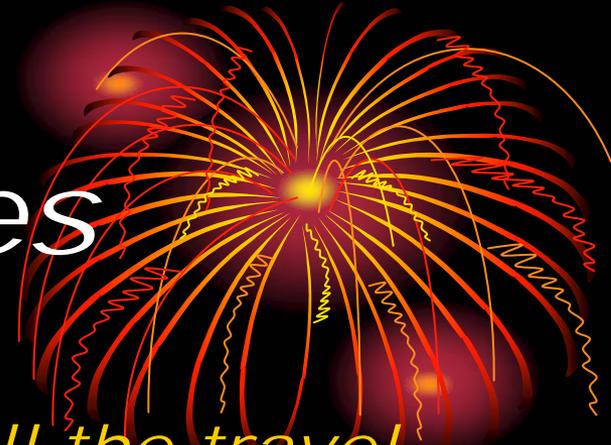

- *CI employees using NOAA email accounts should have an automatic signature that indicates they are a CI employee and not a NOAA government employee*
- *Publications with NOAA co-authors may need to include a disclaimer that the report is of the author and not a specific NOAA/DoC endorsement.*

# *Offices and Supervision*

- *Please ensure it is clear where NOAA offices are and where CI offices are if there is a mixture of personnel*
- *Please ensure it is clear that CI personnel are supervised by CI management and NOAA personnel are supervised by NOAA management*

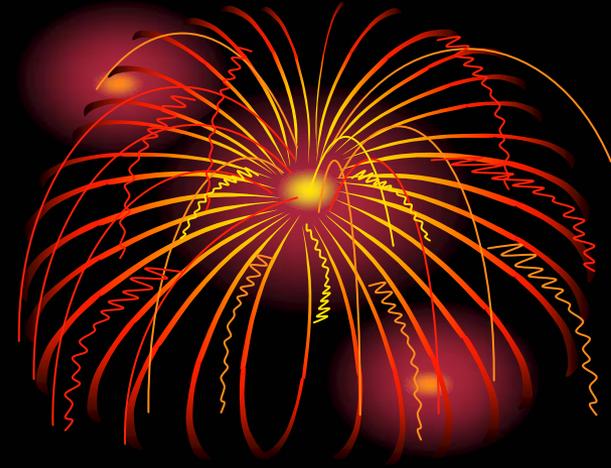

# *Student Exchanges*

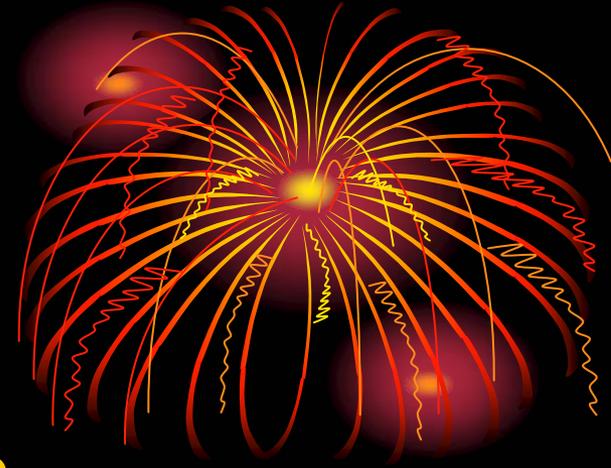

- *STAR is no longer organizing all the travel*
- *CIs have funds from STAR*
  - *Spend funds on student and early career scientist exchanges this summer.*
- *Use CoRP blog to announce students/hosts who are interested in participating in the exchange program*
- *Use this meeting, CoRP blog, etc to identify and finalize the exchanges*
- *This year we encourage CIs to visit CREST since CREST does not have specific funds (STAR ran out of money ☹ )*

# CoRP Blog

- *Student Exchanges*
- *Internal NOAA funding opportunities*
  - *GOES-R*
  - *Product Systems Development*
  - *Ground Systems*
  - *High Performance Computing*
  - *Mini-grants*
- *Meetings*
- *Job announcements*
- *Anyone with the secret email can post to the website (just ask me)*

# *Importance of CI Themes*

- *All proposals under the cooperative agreement must be under one of the CI themes*
  - *If it is not a theme then a different funding vehicle must be used*
